

Handling Export and Import of **NVOCC** Containers

NVOCC Agency Services

We look forward to Partner with Non-Vessel Operated Common Carriers (NVOCC' s) from the Indian sub-continent, the Middle East region and South East Asia for a mutual growth and cooperation. Bluebay Bahrain believes in mutual commitments and therefore we partner with only those NVOCC's having nonidentical containers impex specializations and location preferences to cover a wider range of customers and to justify a quick turn around of our Principal line Containers.

Our key to Principal satisfaction is to provide our agency management services to those dedicated NVOCC's, who are proficient in accepting exports to certain preferred sectors, which enables us to keep a regularity or Local Exporters with the same Principal line, connecting both the NVOCC as well as the Shipper's directly, which enables us to keep the momentum.

Our expert IMPEX (Import-Export) team ensures a exclusive Sales of our Principal Line Containers to various exporters in Bahrain for a swift turn-around of containers to preferred locations as preferred by our Principal as we maintain a regular Support

from Bahraini local manufacturing companies, scrap & Oil traders in Bahrain, who usually move their consignment to preferred sectors of the NVOCC's.

We have a dedicated Storage facility (Empty Container Storage Depot), which is prioritized for those NVOCC Principal's whom we represent as agents / business partners in Bahrain which further allows the principals at any given time to have a surplus of inventory available for use for the local exporters from Bahrain to various preferred sector of the lines. We provide inspection of empty returned containers and our team is in constant touch with the Principal line office to notify safe handling of Principal line assets.
